

## **Tuesday March 24, 2020**

1. You are able to complete this online class anytime - as all materials are available to you online via email and Google Classroom. We are going to try something new this week - I will be available via Google Voice to chat with you during our scheduled class time. I will not be using Google Hangout as I didn't think it worked very well the first week. The goal each class is for you to complete one assignment and submit it to me - either through Google Classroom or Email.
2. Watch the YouTube video that was created for this lesson. You can then pause the video and rewind the video as you need to - so you can complete the assignment. Read assigned story (page 109 Astronomer story) and complete assignment. You will see instructions and details within the PDF file. I've also included one example of a completed assignment so you see one. You can complete this assignment anytime that works for you. You need to submit an assignment to me to receive credit for the class.
3. There are some additional online resources (separate PDF) that you can use to review some skills. You don't need to submit anything - but they would help you become stronger. These websites are available to you at all times.

### **Homework:**

- Complete the assignment if you weren't able to do it (submit your assignment)
- Choose an online resource to improve your english and math skills

**Optional:** If you didn't complete the assignments from last week (Ron McNair pg 134 and Sol Arimendi pg 239), you could do that. The stories and video readings of the stories were previously posted on Google Classroom.
